

ePoynt™

Fast reliable home/office internet access!

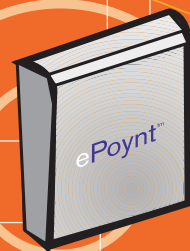

Do you need fast broadband internet? As long as you are in an area that has cellphone coverage – you will never be stuck without Internet access again!

ePoynt is the fastest and simplest way to deploy wireless over a large area. And because our products are designed to work together, you'll have large networks up and running in hours or days instead of weeks or months.

Whether you need a reliable office internet connection or a backup for your existing internet connection, ePoynt has a scalable solution to fit your requirements.

- Wireless internet access at super-fast broadband speeds.
- ePoynt industrial outdoor modem gives reliable consistent fast wireless access far exceeding performance of 3G desktop/USB and data card solutions.
- No need for a Telco line which means that you're not tied down to any desks, cables, wall connections or Hotspots.
- Quick installation, always on, fast and immune to cable breakdown associated with physical lines
- ePoynt is already next generation 7.2 Mb/s ready - no need to upgrade. Future 14 Mb/s and 28 Mb/s expansions can be accommodated with change of one sub module of the unit
